INTRODUCTION AND EXECUTIVE SUMMARY

The East Turlock Subbasin Groundwater Sustainability Agency (ETSGSA or Agency) is the Groundwater Sustainability Agency (GSA) responsible for implementing the Sustainable Groundwater Management Act (SGMA) in the Merced and Stanislaus County portion of the San Joaquin Valley-Turlock Subbasin (California Department of Water Resources' Subbasin 5-022.03). Member agencies of ETSGSA include Merced County, Stanislaus County, Ballico-Cortez Water District (BCWD), Merced Irrigation District (Merced ID), and Eastside Water District (EWD) (each a "Member"). As a GSA, the Agency may develop, adopt, and implement a Groundwater Sustainability Plan (GSP) for sustainable management of groundwater underlying ETSGSA's service area.

The ETSGSA and West Turlock Subbasin Groundwater Sustainability Agency (WTSGSA) share responsibility and costs for implementation of SGMA in the Turlock Subbasin of the larger San Joaquin Valley groundwater Basin. Through a collaborative effort, ETSGSA and WTSGSA are developing one GSP to achieve sustainable groundwater management by 2042 and will work together to achieve SGMA compliance in the Turlock Subbasin including adopting and submitting the joint GSP to the California Department of Water Resources (DWR) by January 31, 2022, as well as GSP implementation, groundwater monitoring, and reporting required under SGMA.

To ensure initial SGMA compliance and to provide a mechanism to begin this long-range effort, the ETSGSA Member agencies agreed to fund Agency operations for the first four years and share costs in proportion to groundwater extractions within the boundaries of each Member agency.

ETSGSA operations include expenses for general Agency administration, including but not limited to office costs, insurance, professional services, legal services, bookkeeping and accounting services, dues and subscriptions, travel, technical consulting services, compliance with Proposition 218, website maintenance, groundwater sustainability planning, coordination, well monitoring, annual reporting, and grant writing.

The ETSGSA and WTSGSA have been working hard to limit SGMA-related costs. The GSAs received Proposition 1 grant funding to cover some of the costs to develop a GSP and monitoring network; however, ETSGSA's share of costs for GSP preparation and implementation of required SGMA administration exceed available funding sources including: funds from the agencies' other sources, grant funding, and EWD's contribution from its Diffused Surface Waters Project Charge. Thus, fees are needed to make up the shortfall.

Landowners within EWD's service area will not be charged the proposed landowner fee, because they pay their share of ETSGSA's administrative costs through a portion of EWD's Diffused Surface Water Project Charge. Costs for designing, permitting, and building projects. If any unforeseen management actions resulting from GSP

implementation cause a funding shortfall, ETSGSA will consider separate fees, assessments, or charges.

To fund its activities and the development, plus implementation of an adequate GSP, the ETSGSA developed a budget of up to \$502,739 in annual administrative expenses spanning fiscal years 2021-22 to 2030-31, and the Agency's Board of Directors is seeking fees to generate sufficient revenue to fund ETSGSA administrative expenses during that period. SGMA administrative expenses and fees are expected beyond that period and through the SGMA implementation horizon of 2042.

SGMA provides authority for ETSGSA to charge fees to support its operations. Failure to adequately manage the groundwater basin may subject the GSA to intervention by the State Water Resources Control Board (SWRCB).

The Agency's Board of Directors have determined to follow a Proposition 218 process before implementation of the proposed fees. Each parcel of land within the ETSGSA's boundary is receiving SGMA management services from the ETSGSA. The fees were developed by allocating ETSGSA's budget for SGMA administrative costs in proportion to that part of the parcel that is within the subbasin boundary (in acres) and larger than one acre, after EWD has paid its share. By law, the ETSGSA may only collect revenue from property related fees/charges that is required to provide the cost of a water related service.

One of the ETSGSA's foundational Guiding Principles is to protect its service area from extremely expensive and intrusive SWRCB groundwater intervention actions. If the SWRCB intervenes in the Turlock Subbasin, it may impose annual fees ranging from \$100 per de minimis well and \$300 for other wells, plus up to \$55 per acre-foot (AF) pumped, with no guarantee of assistance in bearing costs to address the groundwater issues prompting its intervention. For more information see: https://www.waterboards.ca.gov/water_issues/programs/gmp/docs/sgma/sgma_probation.pdf. By collecting the proposed SGMA Administrative Fees, the ETSGSA will provide landowners with local groundwater management with a tailored, more affordable approach for managing the Turlock Subbasin.

The fees are proposed to be charged on a proportional scale, whereby all parcels in the ETSGSA – but not in EWD – pay a minimum amount. Those parcels dedicated to Irrigated Agriculture in the ETSGSA – but not in EWD – will pay an additional premium to account for their direct impacts to the aquifer.

The phrase "Irrigated Agriculture" is defined as those parcels identified as being used for Farming, Trees or Vines, Dairy, and Poultry, according to land use code or land use types attributed to the parcel by the Merced County and Stanislaus County Assessor's offices.

The fee rolls provided in **Appendices B and C** identify the acreage for each parcel that would be subject to the proposed fees according to the 2020-21 tax rolls of Merced and Stanislaus Counties for parcel acreage and Provost & Pritchard's deduction for portions of parcels that lie outside of the subbasin boundary line established by DWR.

Parcels that are one acre in size and smaller, after deducting areas outside of the subbasin boundary (potentially de minimus users under SGMA), are not included in the Fee Rolls, and therefore not included in acreage and fee calculations.

Table ES-1 provides a schedule of the proposed maximum fees to be collected from landowners within the boundaries of each ETSGSA Member agency to proportionally recover operating expenses calculated using an estimated annual budget of \$493,200 to arrive at the proposed easily administered maximum dollars/acre annual fees. The actual fees will be set annually by the Board of the ETSGSA, based on the actual budget needs, but will not exceed the proposed maximum rates identified below (\$0.95/acre base fee and \$4.55/acre supplemental fee for Irrigated Lands). Operational expenses have not been projected beyond Fiscal Year 2030-31, but they are anticipated to continue in similar fashion through 2042.

Table ES-1. Proposed Maximum Fee Schedule

	Percentage of ETSGSA JPA based on GW production	\$491,984 Budget Cost Share
Eastside Water District	60.63%	\$299,076
Other Four JPA Members	39.37%	\$194,173
Total	100.00%	\$493,200
	Irrigated Acres > 1.0 Acre	Non-Irrigated Acres > 1.0 Acre
BCWD, Merced ID, Stanislaus County, and Merced County	29,358	34,423
	Proposed Fee per Acre	Resulting Revenue
Base SGMA Administrative Fee (paid by Irrigated and Non- Irrigated)	\$0.95	\$60,592
Supplemental SGMA Administrative Charge (paid by Irrigated lands only)	\$4.55	133,580
Total		\$194,173

Complete funding for GSP implementation including costs associated with projects to attain sustainability and maintain the threshold levels established in the GSP will likely require supplemental funding and local fees or assessments greater than the maximum

fees recommended in this report, and approval by the landowners in a future Proposition 218 election will be required for those fees or assessments.

ETSGSA is seeking approval to implement an annual charge per acre within the subbasin that is larger than one acre in the maximum amount shown in Table ES-1, specifically, a minimum charge of \$0.95/acre for all parcels, and an additional charge of \$4.55/acre in the Irrigated Agriculture group. Note that the fees applied by ETSGSA may vary from year to year but will not exceed this maximum amount unless an increase is approved through a subsequent Proposition 218 proceeding. **The necessary funding for ETSGSA will be reviewed annually by its Board of Directors and, depending on the funds projected to be needed for the year, may be approved up to the maximum rate.** The proposed maximum annual rate allows ETSGSA to apply the proposed fees to pay anticipated increases in operating expenses and fund special activities without having to incur the expense of repeating the Proposition 218 process.

The ETSGSA Board of Directors has chosen to adopt the proposed fees in accordance with provisions of Proposition 218, as reflected in Article XIII D of the California Constitution and Sections 53750 through 53758 of the State's Government Code. While SGMA allows a per acre fee to be imposed to prepare a GSP, ETSGSA has made the decision to follow the procedural requirements of Proposition 218 to fully inform ETSGSA's landowners while simultaneously giving them a direct say in the matter.

The ETSGSA Board of Directors will hold a public hearing at which all landowners may participate and those affected by the proposed fees may protest the proposed maximum fee rate. At the public hearing, ETSGSA will consider and address comments and questions from landowners within the ETSGSA. Landowner protests received prior to the close of the public hearing will be counted, and the results will be certified. If written protests against the proposed fees are not presented by a majority of property owners of the identified parcels upon which the fees are proposed to be imposed, the ETSGSA intends to adopt and impose the charges at the close of the public hearing.

1. PURPOSE OF THE REPORT

1.1. General

This Fee Study is prepared to describe the proportional cost distribution of the fees to be imposed by ETSGSA on each parcel within the ETSGSA boundaries, except for EWD landowners. The proposal is for the Agency to collect revenue in the form of fees that will be used to cover administrative costs associated with SGMA compliance. These administrative costs include expenses for general administration, office costs, insurance, professional services, legal services, bookkeeping and accounting services, dues and subscriptions, travel, technical consulting services, compliance with Proposition 218, website maintenance, groundwater sustainability planning, coordination, well monitoring, annual reporting, and grant writing.

The ETSGSA and WTSGSA have been working hard to limit SGMA-related costs. The GSAs received Proposition 1 grant funding to cover some of the costs to develop a GSP and groundwater monitoring network; however, ETSGSA's share of costs for GSP preparation and implementation and required SGMA administration exceed available funding sources including: funds from the Member agencies' other sources, grant funding, and EWD's contribution from its Diffused Surface Waters Project Charge. Thus, these fees are needed to make up the shortfall.

1.2. Sustainable Groundwater Management Act

On September 16, 2014, the Governor of California signed into law a three-bill legislative package (Senate Bill 1168, Assembly Bill 1739 and Assembly Bill 1319) that provided a framework for statewide sustainable groundwater management. SGMA defines sustainable groundwater management as the *management and use of groundwater in a manner that can be maintained during the planning and implementation horizon without causing undesirable results*. *Undesirable results* are defined in SGMA as any of six primary effects caused by groundwater conditions occurring throughout the basin:

-  Chronic lowering of groundwater levels indicating a significant and unreasonable depletion of supply
-  Significant and unreasonable reduction of groundwater storage
-  Significant and unreasonable seawater intrusion
-  Significant and unreasonable degraded water quality
-  Significant and unreasonable land subsidence
-  Depletions of interconnected surface water that have significant and unreasonable adverse impacts on beneficial uses of the surface water

These undesirable results are the focus of SGMA and must be addressed in GSPs prepared by GSAs. GSPs must focus on assessing, monitoring, and mitigating undesirable results caused by groundwater use. Some of these undesirable results, such as sea water intrusion, are not applicable to the ETSGSA area, while others, such as lowering of groundwater levels and reduction in groundwater storage are significant issues in some areas and will need to be addressed and corrected. Each undesirable result is being investigated and prioritized as part of the ongoing GSP development. The GSP will include measurable objectives and implementation actions to achieve and maintain groundwater basin sustainability. SGMA requires the development and implementation of GSPs that document the proposed plan and programs for achieving groundwater basin sustainability within a prescribed 20-year window. During the GSP implementation phase, ETSGSA will be required to adopt programs to facilitate measures outlined in the GSP, update the GSP every five years, and provide DWR with annual updates on the progress of achieving sustainability.

1.3. Agency's Authority to Charge Fees

ETSGSA is a five-member, multi-agency Joint Powers Authority (JPA) that was formed to be the GSA responsible for implementation of SGMA in the eastern portion of the Turlock Subbasin. ETSGSA Member agencies include the Stanislaus County, Merced County, Merced ID, BCWD, and EWD.

To ensure initial SGMA compliance and to provide a mechanism to begin this long-range effort, the ETSGSA Member agencies agreed in 2017 to fund the Agency operations for the first four years and share costs in proportion to groundwater extractions within the boundaries of each Member agency. Now, landowner fees for lands in ETSGSA – but not EWD – are proposed to cover ETSGSA's administrative expenses that are not covered by EWD's Diffused Surface Waters Project Charge. ETSGSA has been deemed the exclusive local agency with powers to comply with SGMA in its area. Pursuant to Chapter 8 (commencing with Section 10730) of Part 2.74 of Division 6 of the Water Code, a GSA may impose fees, including, but not limited to, permit fees and fees on groundwater extraction or other regulated activity, to fund the costs of a groundwater sustainability program, including, but not limited to, preparation, adoption, and amendment of a GSP, and investigations, inspections, compliance assistance, enforcement, and program administration, including a prudent reserve.

1.4. State Intervention Alternative

If local GSAs are unable or unwilling to sustainably manage their groundwater basin, the SWRCB may step in to protect the groundwater resources using a process called state intervention. The SWRCB would be responsible for setting and collecting fees to recover the costs associated with state intervention and has established a fee structure as shown in **Appendix A**. The SWRCB fee schedule, if applied to ETSGSA area, would cost overlying users of groundwater significantly more than current estimates under the local control option, as demonstrated by these proposed SGMA Administrative Fees.

As explained in **Appendix A**, the SWRCB can and will intervene and implement the requirements of the SGMA legislation in the east Turlock Subbasin if locals are unable or unwilling to comply with the law. In such a case, the Subbasin would be considered a “Probationary Basin” by the SWRCB and directly charge the intervention fees to each groundwater extractor (landowner). The SWRCB fees would be as follows:

- Base Filing Fee: \$300 per well, plus \$40 per acre-foot (AF) per year (Probationary Basin) or \$55 per AF per year (Interim Plan), plus costs for needed studies.

For illustration of these costs, suppose the SWRCB determines the basin to be a Probationary Basin and a landowner has 40 acres with one well and the demand is 3.0 AF per acre. The associated annual SWRCB fees would be \$300 (filing fee) plus \$4,800 (3.0 AF/acre x 40 acres x \$40/AF) for a total of \$5,100 per year. If the SWRCB determined the basin needed an Interim Plan, the annual cost would go to \$6,900. Over the next ten years, the 40-acre landowner would pay \$51,000 to \$69,000 based on SWRCB designation, with no guarantee of assistance in bearing costs to address any groundwater issues that prompt its intervention.

By comparison, under the rates and schedule proposed for ETSGSA, this same landowner would pay a maximum of \$220 per year (40 acres x \$5.50/acre) and \$2,200 over a ten-year period. From a cost standpoint, as well as a regulation standpoint, the desire is to prevent state intervention. As such, the purpose of ETSGSA is to fully comply with SGMA on behalf of its landowners to avoid state intervention.

1.5. Proposition 218 Requirements

In November 1996, the California voters approved Proposition 218, the *Right to Vote on Taxes Act*, which added Article XIII D to the California Constitution. Proposition 218 imposes certain requirements relative to the imposition of certain assessments, fees and charges by local agencies. ETSGSA has made the decision to voluntarily comply with the provisions of Proposition 218 to fully inform ETSGSA’s landowners while simultaneously giving them a direct say in the matter.

In general, to comply with the substantive requirements of Proposition 218, before a local agency can levy new fees or charges, they must confirm the following:

1. Revenues derived from the fee or charge must not exceed the funds required to provide the property-related water service;
2. Revenue from the fee or charge must not be used for any purpose other than that for which the fee or charge is imposed;
3. No fee or charge may be imposed for general governmental services, such as police, fire, ambulance, or libraries, where the service is available to the public in substantially the same manner as it is to property owners;
4. The amount of a fee or charge imposed upon any parcel or person as an incident of property ownership must not exceed the proportional cost of the water service attributable to the parcel; and,
5. The fee or charge may not be imposed for service, unless the service is actually used by or immediately available to, the owner of the property in question.

1.6. Limitations of the Fee Study and Revenue Objectives

This report is limited to the proposed fees to fund ETSGSA's administrative costs and to comply with the requirements of SGMA forecast over the next ten years.

2. ETSGSA BACKGROUND INFORMATION

2.1. Location

ETSGSA is located in both Stanislaus and Merced Counties and encompasses a total area of approximately 153,000 acres with 1,800 parcels within its boundaries. The location of ETSGSA is shown in **Figure 1**. ETSGSA is located within the Turlock Subbasin of the San Joaquin Valley Groundwater Basin as defined in DWR Bulletin No. 118.

Agriculture is the major producing industry in the territory of ETSGSA. Based on the 2019 Crop Report for Merced and Stanislaus County, top commodities reported by the Agricultural Commissioners include milk, almonds, chickens, cattle and calves, and fruit and nut trees. The communities of Ballico and Cortez have been identified by DWR as disadvantaged communities (DACs). The boundaries of ETSGSA includes areas within BCWD, Merced ID, and other lands in Merced and Stanislaus Counties.

The Turlock Subbasin has been designated by DWR as a "high priority" but not critically overdrafted groundwater basin. SGMA requires high priority but not critically overdrafted subbasins such as the Turlock Subbasin to submit a GSP by January 31, 2022. WTSGSA is responsible for implementation of the SGMA in the western portion of the Turlock Subbasin as shown in **Figure 2**. Member agencies of WTSGSA include the City of Ceres, the City of Hughson, The City of Modesto, the City of Turlock, the City of Waterford (for Hickman), Delhi County Water District, Denair Community Services District, Hilmar County Water District, Keyes Community Services District, Turlock Irrigation District, and other lands in Stanislaus and Merced Counties. Under SGMA, ETSGSA is responsible for coordinating with other GSAs in the Turlock Subbasin, either with one joint GSP or several coordinated GSPs to achieve sustainability at the subbasin level. Through a collaborative effort, ETSGSA and WTSGSA are developing one joint GSP and will work together to achieve SGMA compliance. Collectively, the GSAs, through implementation of the GSP, must achieve the sustainability goal for the entire Turlock Subbasin within 20 years of implementation (by 2042) without adversely affecting the ability of adjacent basins to implement their respective GSPs or achieve their respective sustainability goals.

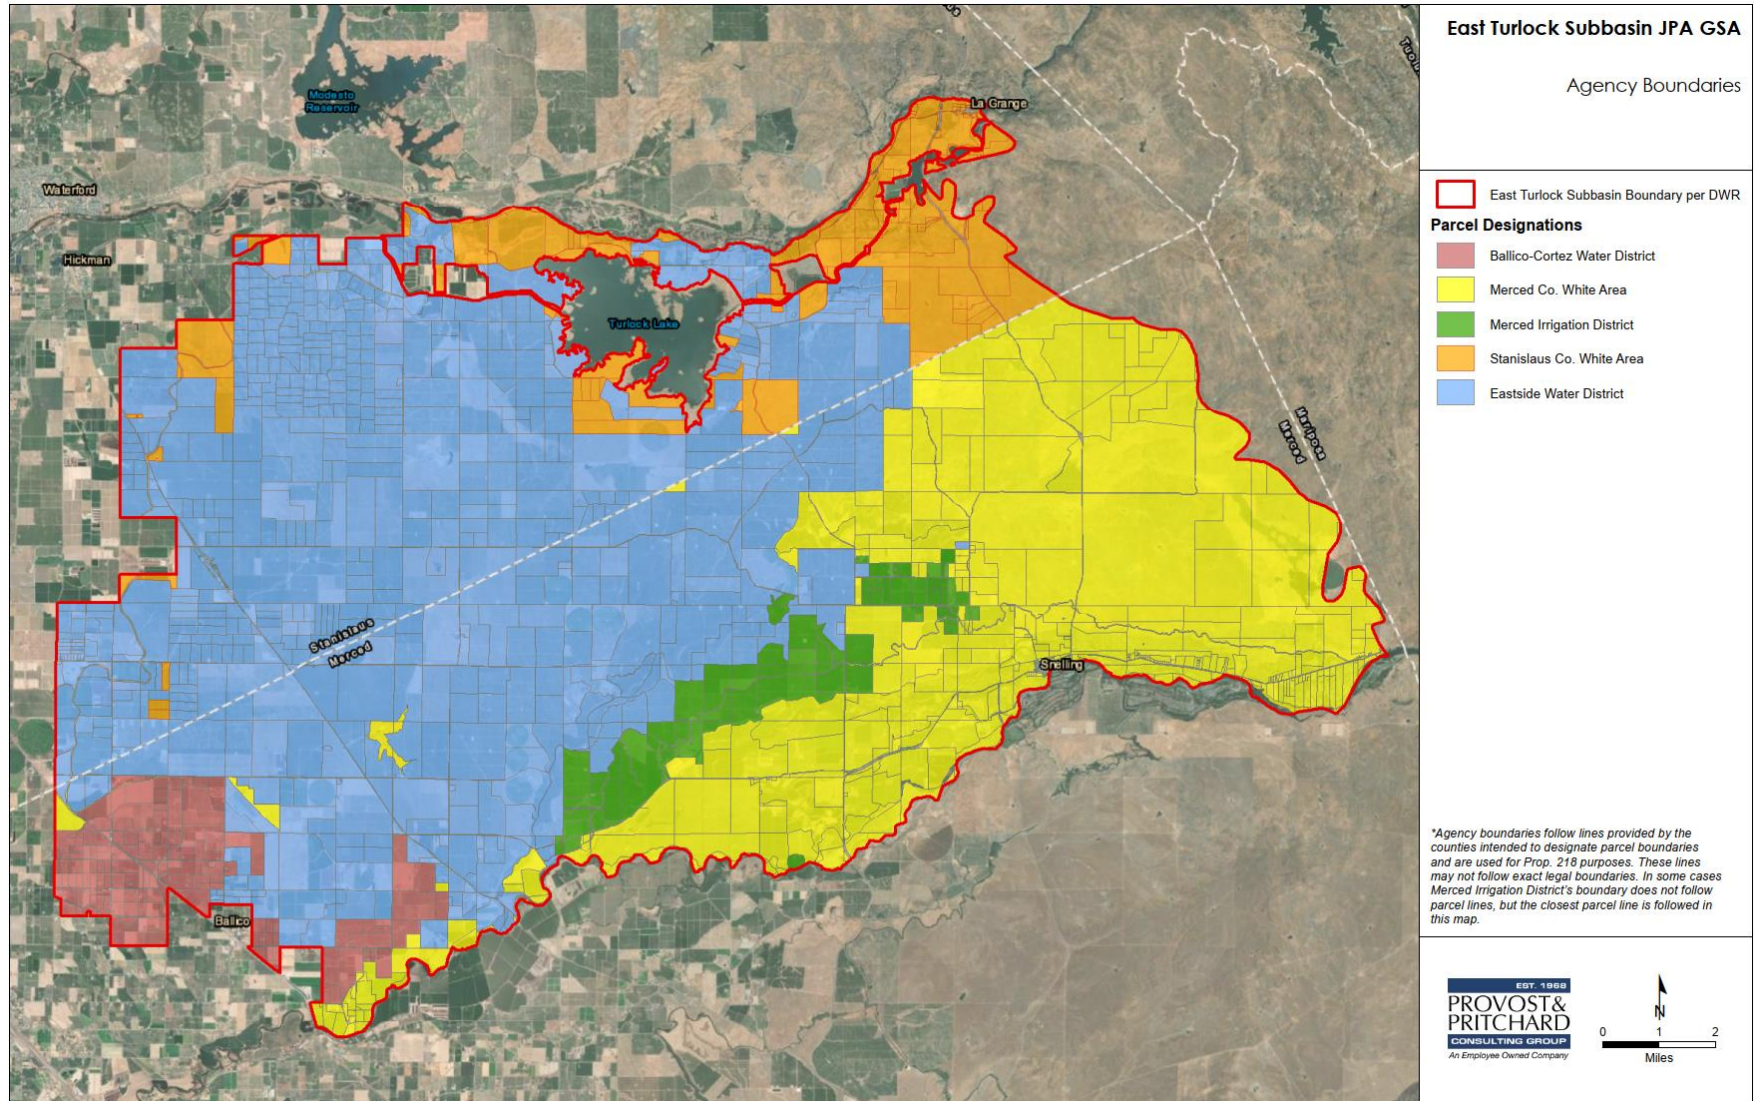

Figure 1. Member Agency Location Map

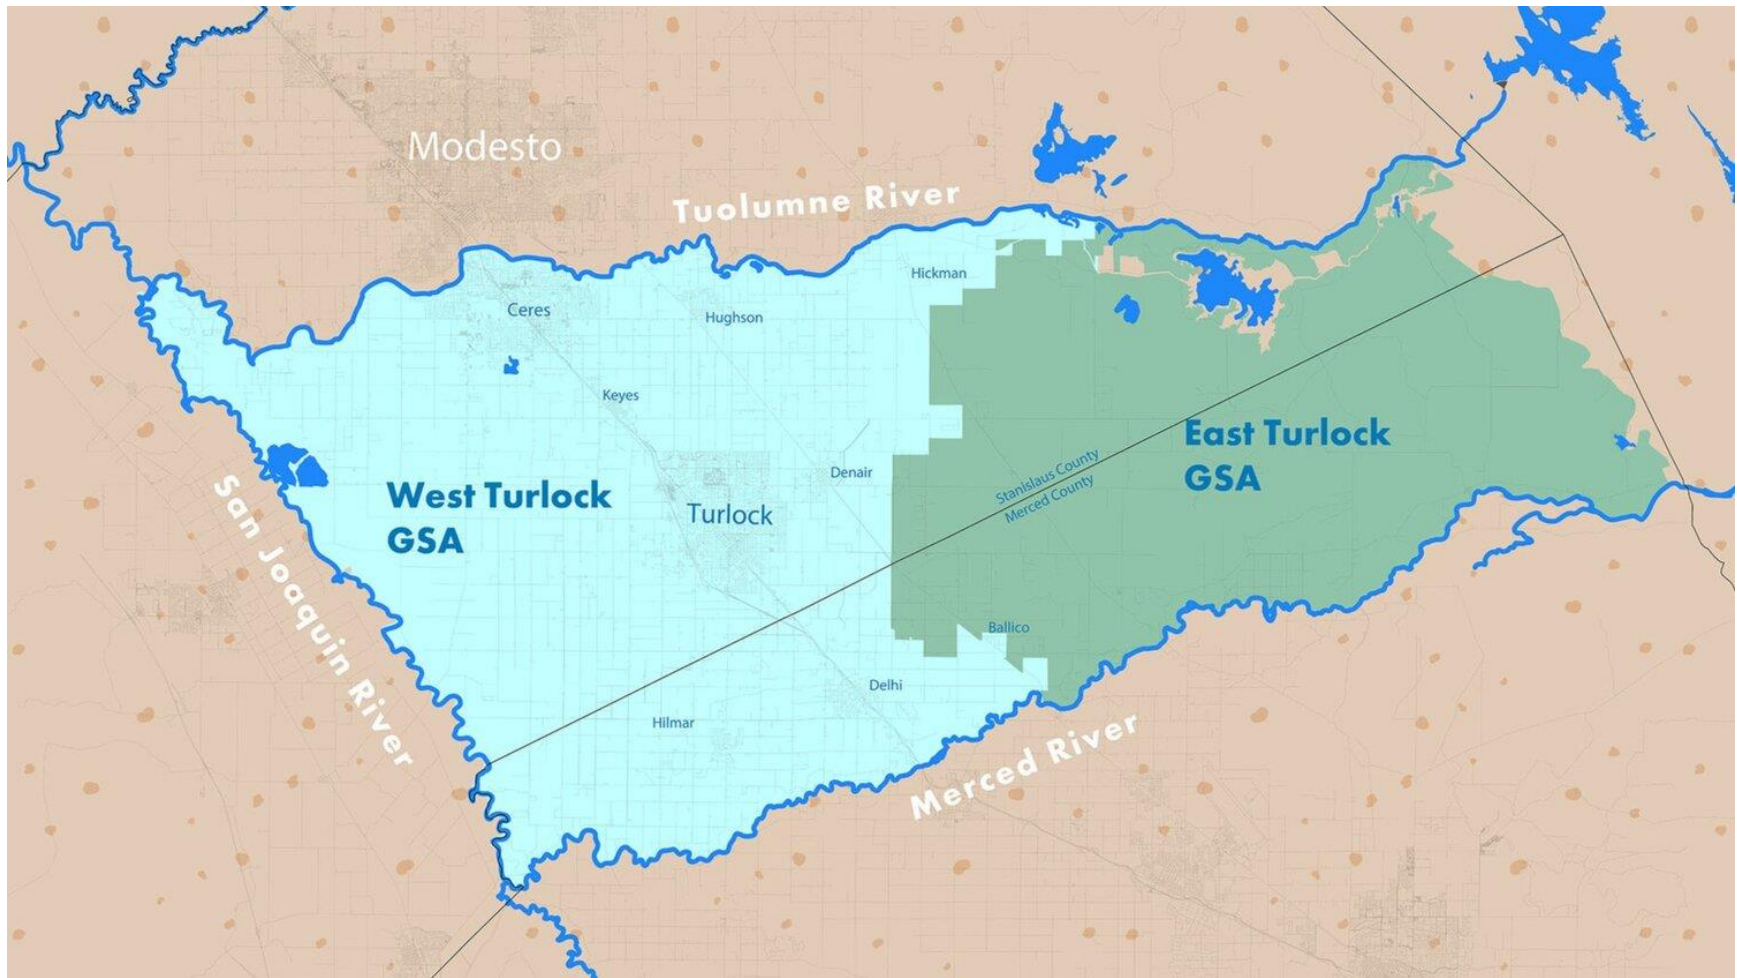

Figure 2. Turlock Subbasin GSA Map

2.2. History

ETSGSA is a JPA comprised of five Member agencies formed on March 31, 2017. A primary purpose for forming the Agency was to fulfill the role of a GSA for compliance with SGMA on behalf of the landowners in the area to allow direct local representation for implementation of the 2014 SGMA legislation. As a public entity, ETSGSA provides a voice for local landowners during GSP development and implementation for its portion of the Turlock Subbasin.

A significant amount of groundwater is pumped within ETSGSA's service area on an annual basis to meet domestic and agricultural water needs. All domestic water supply needs in the area are met with groundwater. Agricultural water users within ETSGSA's service area that do not have a surface water supply must rely upon groundwater to meet their entire agronomic water demand.

3. AGENCY FINANCIAL INFORMATION

ETSGSA obtained funding for administrative activities from inception to date through voluntary contributions from Member agencies. ETSGSA Member agencies have funded ETSGSA for the first four fiscal years (July 2017–June 2021). This included cash contributions and donated staff time. As discussed above, the primary purpose of the Agency is to organize and represent the landowners for the purposes of SGMA. ETSGSA's administrative activities are expected to continue annually. Various technical studies are planned to be undertaken to better identify the characteristics of the groundwater basin, evaluate technical reports by others, and ultimately, in concert with WTSGSA and stakeholders in the Turlock Subbasin, develop and implement one GSP for the Turlock Subbasin. ETSGSA and WTSGSA also plan to coordinate with GSAs in adjacent subbasins consistent with SGMA requirements. The technical studies and GSP development are discrete activities with costs primarily in the early years of SGMA compliance, with implementation of the GSP adding increasing costs beginning with Fiscal Year 2021-22. The remainder of this section provides further detail on the estimated costs for each component of the proposed budget for this funding proposal.

3.1. Administrative Costs

Under this proposal, ETSGSA is seeking to collect fees to fund its annual administrative costs including operating expenses, GSP preparation and updates, and monitoring and reporting in compliance with SGMA.

GSP implementation will include groundwater monitoring and development of programs and projects to attain groundwater sustainability. Funding for projects, to implement the GSP and achieve sustainability, will depend on additional fees or assessments that would be subject to subsequent Proposition 218 processes. It should be noted that although the GSP development and initial implementation is partially funded through a State grant and EWD's Diffused Surface Water Project Charge, future grant funding could reduce the

level of ETSGSA fees in one or more years. Also note that the fees are proposed as a maximum amount for each subsequent year through fiscal year 2030-31. It is up to the ETSGSA's Board of Directors to set the actual fee to be imposed in any particular year. If the projected annual fiscal year budget is less than the maximum rate, the Board of Directors may use any overages as a prudent reserve fund which, when spent, will be used for the purpose for which the fees were collected.

Sections 3.1.1 and 3.1.2 show the estimated expenses for the next 10-year period, organized by major categories and sub-categories. Actual costs for particular sub-categories may be more or less than projected, and, as identified in this Fee Study, the Board of Directors has the authority to move funding to sub-categories needing additional funding or to offset additional costs within the major categories with grants or other funding that may become available to ETSGSA, as long as the total costs do not exceed the maximum fees proposed in this report. Additionally, if funds are available from the collected charges that are beyond the immediate needs of ETSGSA, the Board may choose to establish prudent reserves for anticipated costs within these major cost categories. **It will be up to ETSGSA's Board of Directors to set the annual fee and the Board of Directors may choose to set the annual fee lower than the maximum fee justified in this report and approved by the landowners.**

The major categories and sub-categories of estimated costs are listed below.

3.1.1. Prior Expenditures and Current Budget

Table 3-1 lists ETSGSA's previous years expenses and current fiscal year budget which includes an estimate of the costs associated with conducting a Proposition 218 election. Pre-formation and formation costs (start-up) were from Member agency contributions and are not included in the budget going forward. These prior expenditures and the current budget are being funded by voluntary contributions from Member agencies and some grant funds.

Table 3-1. Prior Expenditures and Current Budget

Operating Expense	Historical			Current
	2017-18	2018-19	2019-20	2020-21
Administrative Fees (Board Secretary)	1,253	11,659	13,506	19,200
Coordinator	-	-	-	58,500
Office Expense (postage, bank fees, reproduction)	-	-	1,064	1,300
Insurance Expense	-	-	1,091	1,200
Miscellaneous (publications & legal notices)	-	1,523	-	500
Professional Services	-	68,515	67,686	-
Legal	-	-	-	51,300
Bookkeeping	-	-	-	-
Dues and Subscriptions	-	-	563	500
Depreciation Expense	-	-	1,037	
Annual Audit	-	-	-	5,000
Travel Expense	-	-	1,441	2,000
Technical Consulting Services SGMA	4,693	26,337	-	54,000
Proposition 218 Election	-	-	-	32,100
Website Expense	-	-	2,500	-
Groundwater Sustainability Plan	-	80,000	128,872	140,893
Well Monitoring Plan	-	-	38,757	71,568
Total Operating Expense	5,946	188,034	256,517	438,061

3.1.2. Annual Administration

Consultants have been retained as the administrative agents responsible for administrative tasks assigned by the Board of Directors including the following tasks:

1. Coordinate meetings, prepare and distribute agenda packets, attend Agency Board meetings, and brief the Board on all relevant issues;
2. Create, supervise and coordinate accounting, general engineering, hydrogeological, and similar technical work necessary to accomplish the Board of Directors' directives;
3. Perform educational and outreach activities; and
4. Coordinate the annual collection and maintenance of general Agency information necessary to comply with SGMA, including land ownership, land use types and acreage, surface water deliveries, groundwater usage, assessment tracking, and similar.

Under this proposal, ETSGSA is seeking to incur future annual operational and SGMA-related expenses, subject to landowner majority protest.

If a higher fee is necessary to meet ETSGSA's SGMA obligations because of projects or other causes of funding shortfalls during implementation, the Board will comply with the appropriate constitutional, statutory, and regulatory processes to increase fees, or impose other fees, charges or assessments. The proposed fees, if approved, are anticipated to

be levied starting in the Fall of 2021 and payable with County taxes. For both Merced and Stanislaus Counties, the proposed fees are due in two installments; the first installment is delinquent if not received by December 10 of each year, the second is delinquent if not received by April 10.

Table 3-2 lists the estimated annual budget for the ETSGSA's administrative costs. These estimated costs include an assumption that costs will inflate at 2.5 percent per year, based on both a review of inflation seen in recent years and the Federal government's projections of future inflation rates.

Table 3-2. Projected Ten-Year Annual Budget

Operating Expense	Projected				
	2021-22	2022-23	2023-24	2024-25	2025-26

4. BENEFITS DETERMINATION

4.1. General

For the activities covered in this initial 10-year budget, ETSGSA intends to implement a minimum charge for all parcels¹ greater than one acre. The rationale is that the existence of ETSGSA and its development of a GSP in compliance with SGMA benefits all landowners within its boundaries. Although some properties might not presently utilize groundwater, all parcels have overlying groundwater rights and development of a GSP will provide SGMA compliance for those parcels and protect their future groundwater rights. For those parcels identified in the Irrigated Agriculture group, ETSGSA proposes to impose an additional charge due to their direct impacts to the aquifer.

This section provides the breakdown of the benefits that are to be attributed to landowners within the ETSGSA's boundaries if the proposed charges are approved. **Table 4-1** summarizes the total land use acreage in the ETSGSA's service area in the Turlock Subbasin.

Table 4-1. Acreage Subject to ETSGSA Fee

Land Use Category	Acres	Irrigated?
Trees or Vines	20,410	Yes
Farming	5,815	Yes
Dairy	3,069	Yes
Poultry	64	Yes
Grazing	23,192	
Dry Farming	6,543	
Government	1,973	
Sand & Gravel	1,632	
Vacant	475	
Commercial	260	
Residential	151	
Miscellaneous	84	
Mobile Home	62	
Utility Roll	41	
Churches	10	
Total	63,782	
Irrigated	29,358	
Non Irrigated	34,423	

¹ Eastside Water District will not be charged the proposed landowner fees as it has funding for its share of ETSGSA administrative costs through its Diffused Surface Water Project Charge.

The lands that have been identified as being subject to ETSGSA fees are illustrated in **Figure 3**. The proposed 2021-22 ETSGSA Fee Rolls are included as **Appendix B and C**.

Parcels one acre or less in size (potentially de-minimis under SGMA) are not included in the Fee Rolls, and therefore not included in acreage and fee calculations.

Irrigated Agriculture is the majority user of groundwater in the ETSGSA. After much consideration and to distribute the budget more fairly, the ETSGSA Board of Directors determined that Irrigated Agriculture would pay a premium amount in addition to the base cost that all landowners will pay. That premium was determined to be five times the base cost.

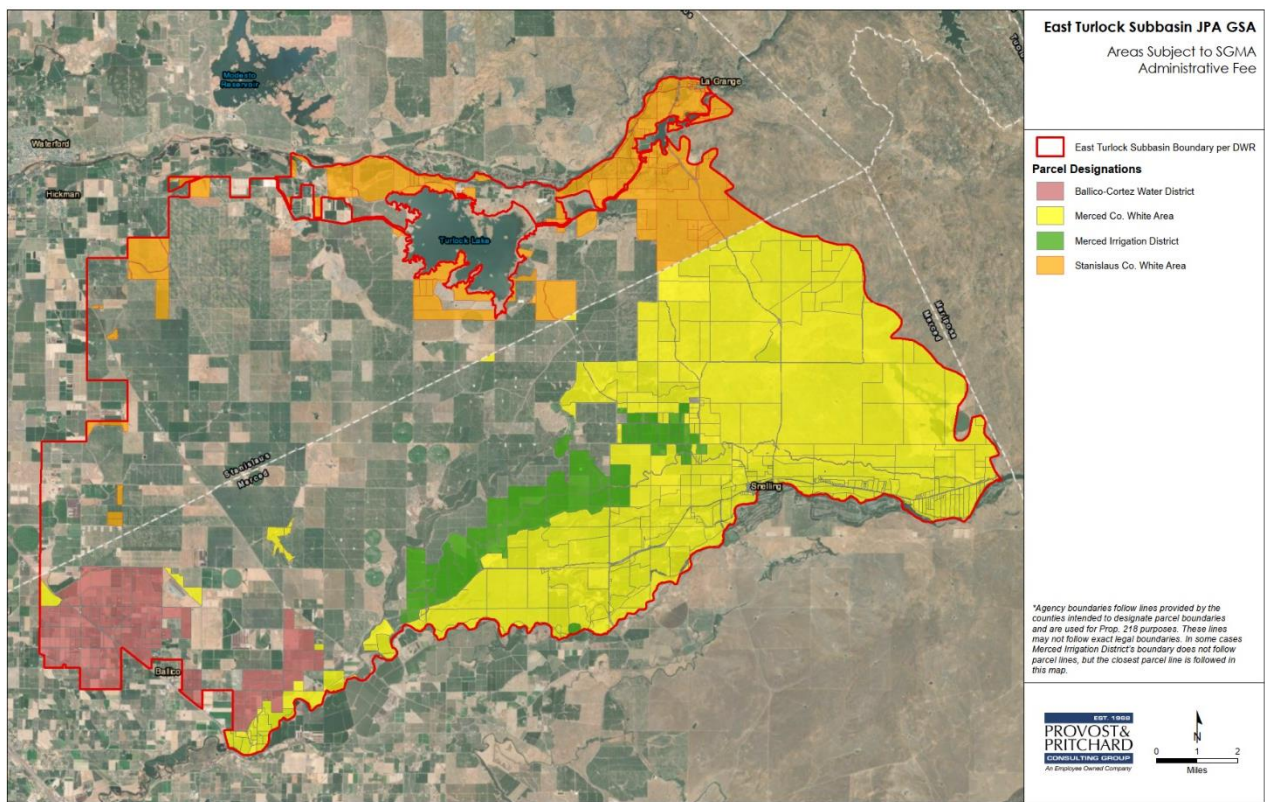

Figure 3. ETSGSA Lands Subject to Fees

4.1.1. ETSGSA's Administrative Costs Associated with GSP

ETSGSA has incurred operating expenses since prior to its formal inception and has retained consultants and legal counsel to address SGMA related issues and to carry out the efforts identified in **Section 3.1** of this report. The proposed fees may be used to reimburse a portion of these past expenditures related to the GSP, but not to reimburse for GSA formation.

All lands within ETSGSA's boundaries are represented by the GSA, in compliance with SGMA, as opposed to being managed by the SWRCB. However, ETSGSA must take actions related to addressing groundwater changes and groundwater pumping, and ETSGSA's consultants and legal counsel will spend time and effort to keep in conformance with State regulations and laws, for the benefit of all ETSGSA's landowners.

4.1.2. Groundwater Sustainability Plan Development

A large effort under SGMA is the development of the GSP, which could impact current property operations within ETSGSA's boundaries and within the Turlock Subbasin. The benefits of GSP development, and SGMA compliance, accrues to all land within ETSGSA boundaries, and ETSGSA has determined that all non-exempt parcels will receive the benefits arising out of the development of a GSP and should incur a portion of the costs to develop the GSP.

While a particular parcel may not be farmed in a given year, and/or may not directly pump groundwater, and particular parcels may use more or less groundwater, groundwater is potentially available to all land within the territory of ETSGSA and the groundwater resources are shared by all. All landowners are affected if the groundwater resources in the area are not sustainable.

4.1.3. GSP Implementation

Implementation of the GSP will be an on-going effort, and it is anticipated that a significant number of programs and projects will be required to comply with the requirements of SGMA, likely involving groundwater recharge projects or management actions. In addition, after submitting the GSP, the GSP may be subject to possible revisions from DWR. As the burden of SGMA falls on all overlying users of groundwater, and hence all non-exempt parcels, the benefits of GSP implementation and associated costs initially accrue to all those lands.

This fee does not intend to fund the projects needed to reach sustainability. Although some funds are included for GSP implementation, with monitoring and reporting, complete funding for GSP proposed projects, and requirements to attain sustainability and maintain the threshold levels established in the GSP will likely require supplemental funding and local fees or assessments or charges greater than the maximum fees recommended in this report, and approval by the landowners in a future Proposition 218 or Proposition 26 election will be required for those fees, charges or assessments.

4.1.4. No Agency/GSA Alternative

As previously discussed in **Section 1.4**, it is important to note that the SWRCB can and will intervene and implement the requirements of SGMA in the Turlock Subbasin if ETSGSA does not adopt a GSP and the Turlock Subbasin as a whole is unable to comply with the law and reach sustainability. In such case, the Subbasin would be considered a "Probationary Basin" under a SWRCB "Interim Plan." The SWRCB fee schedule for intervening (see **Appendix A**) would be applied directly to each groundwater extractor and would result in significantly higher costs than the local ETSGSA option. Under State Intervention, the State would likely limit how much water could be pumped each year.

What's more, the fees that would go to the State would likely be in addition to the costs to address any underlying groundwater sustainability issues. The State does not need a landowner's permission and does not need to hold a Proposition 218 election to impose such fees and costs. From a cost standpoint, as well as a regulatory standpoint, the desire is for ETSGSA to maintain local control. Success at the local level will prevent State intervention.

5. PROPOSED FEES

This section describes ETSGSA's proposed fees to fund GSA operations and administrative expenses.

5.1. General

Based on the services provided by the Agency, the Agency proposes to charge all parcels not in the EWD up to \$0.95 per acre within the boundaries of ETSGSA where the area within ETSGSA is larger than one acre and, that are identified on the tax rolls of Merced and Stanislaus County. In addition, for those parcels not in EWD in the Irrigated Agriculture group, ETSGSA proposes to charge up to an additional \$4.55 per acre within the boundaries of ETSGSA where the area is larger than one acre due to their direct impacts to the aquifer. The EWD will fund its portion of the GSA administrative costs through its Diffused Surface Water Project Charge, with the amount based on its proportionate share of estimated groundwater pumping in the GSA. **Table 5-1** summarizes the anticipated revenue generated at these rates.

Table 5-1. Proposed Ten-Year Fee Schedule

	Percentage of ETSGSA JPA based on GW production	\$493,200 Budget Cost Share
Eastside Water District	60.63%	\$299,027
BCWD, Merced ID, Stanislaus County, and Merced County	39.37%	194,173
Total	100.00%	\$493,200
	Irrigated Acres > 1.0 Acre	Non-Irrigated Acres > 1.0 Acre
BCWD, Merced ID, Stanislaus County, and Merced County	29,358	34,423
	Proposed Fee per Acre	Resulting Revenue
Base SGMA Administrative Fee (paid by irrigated and non-irrigated)	\$0.95	\$60,592
Supplemental SGMA Administrative Charge (paid by irrigated lands only)	\$4.55	\$133,581
Total		\$194,173

5.2. Proposed Budget Funding and Fee Design

In conformance with this Fee Study, ETSGSA seeks fee revenues to fund its administrative costs including operating expenses, GSP preparation and updates, technical studies, and monitoring and reporting in compliance with SGMA. **Table 5-2** summarizes the proposed budget and total fees needed to fund ETSGSA efforts over the next 10 years. In accordance with Proposition 218, ETSGSA has developed fees proportional to the cost of service attributable to each customer. The costs of administering the GSA for landowners in ETSGSA are proportional to the number of acres covered by the GSA and their relative impact to the aquifer. The GSA currently does not have pumping data for individual parcels, fees proportional to extractions would not be practical or applicable. Therefore, collecting fees on a per acre basis, with a premium charged for Irrigated Lands due to agriculture’s direct impacts on the aquifer, fulfills the proportionality requirement.

Table 5-2. Proposed Ten-Year Budget Summary

	Projected				
	2021-22	2022-23	2023-24	2024-25	2025-26
Total Operating Expenses	438,605	412,621	422,937	433,510	444,348
	Projected				
	2026-27	2027-28	2028-29	2029-30	2030-31
Total Operating Expense	455,457	466,843	478,514	490,477	502,739

5.3. Fee Rolls

Appendix B and C contain the proposed 2021-22 Fee Rolls. These rolls serve as the basis for providing notice to each landowner in ETSGSA, identifying each landowner, the parcels they own as reflected in each County's records, and the acreage for each parcel.

The protest is directly related to the number of parcels owned. The fees will apply unless a majority of parcel owners submit written protests.

5.4. Conclusion

The primary objective of the Board of Directors regarding revenues is to ensure that the Agency's expenditures are truly necessary and that those costs are allocated in a fair and equitable manner. Based on the revenue objectives, ETSGSA's proposal is to fund its annual operations and future activities identified in this 10-year budget that exceed funding from EWD's Diffuse Surface Water Project Charge for the benefit of all parcels within ETSGSA.

Absent funding by these proposed fees, ETSGSA landowners would have no direct representation, GSP, nor any legal means of complying with SGMA. Without such, the SWRCB could take corrective action as provided by SGMA. However, with these proposed fees, properties will receive SGMA compliance with better local representation, planning, and implementation than the SWRCB can provide for substantially lower costs. Without ETSGSA activities funded by the proposed fees, the landowners would pay much higher costs and be left subject to regulation and oversight of the SWRCB.

6. IMPLEMENTATION PROCEDURES

Based on an examination of procedural options available to the Agency's Board of Directors, it is believed that the proposed fee structure offers an equitable procedure to ETSGSA to generate revenues for its administration, operations, GSP preparation and updates, technical studies, and monitoring and reporting associated with SGMA compliance. ETSGSA has chosen to proceed with a protest hearing complying with the provisions of Article XIII D of the California Constitution to allow for the application of SGMA Administrative Fees.

The Agency Board of Directors will be asked to: (a) approve and accept the Fee Study; (b) set a public hearing on the proposed fees; and (c) authorize a Proposition 218 effort to mail (i) notices to affected landowners informing them of the proposed fees, and (ii) instructions to protest the proposed fees. At the public hearing, ETSGSA will state its

intentions and justifications for pursuing this Proposition 218 effort, take into consideration any objections to the proposed fees, and count the written protests received as of the close of the hearing. If a majority of parcel owners submit written protests, ETSGSA will not adopt the fees at the meeting. Absent a majority protest, ETSGSA is authorized to adopt the proposed fees at its public hearing currently set for June 10, 2021 at 10:00 a.m.

Appendix A

State Intervention Fee Structure

APPENDIX A

<u>SWRCB Fees, 2018</u>	
BASE FEE (per well)	\$300
Volumetric Fee (per AF)	
Unmanaged, metered	\$10/AF
Unmanaged, unmetered	\$25/AF
An unmanaged area is a part of a basin <u>not</u> within the management area of a GSA before July 1, 2017	
Probation	\$40/AF
If locals fail to form a GSA, fail to develop an adequate sustainability plan, or fail to implement the plan successfully, the Board may designate the entire basin probationary. The Board may require the use of a meter to measure extractions and reporting of additional information.	
Interim Plan	\$55/AF
If local agencies are unable to fix the deficiencies, the Board will develop an interim plan to directly manage groundwater extractions.	
De minimis (less than 2 AF/year)	\$100/well
Late Fee	25% per month
