

YOU'RE THE SOLUTION TO THE POLLUTION

WWW.STANISLAUSRECYCLES.ORG

Dont worry darling, its just soap!

It's not just soap from washing your car that goes down the storm drain. It's also the oils and dirt from your car that go directly into the drain and run right into our lakes and rivers, untreated, harming the fish and our water.

So, wash your car at a car wash, on the lawn or someplace where it can soak into the ground.

Mitch finally realized what to do with all that motor oil.

Pouring used motor oil down a storm drain is just plain yucky! It dirties our rivers, streams and water supply.

Recycle your used oil and fix those nasty leaks.

All those years of Doggie Obedience School finally paid off.

Always, always, always scoop your dog's poop. If left on the ground, the doo doo could end up on someone's shoe. Even worse, it carries disgusting bacteria that could wash into our rivers, streams and water supply.

Since Fido can't...do your part. Carry a bag and pick up the poop.

My lawn is greener than your lawn.

The pesticides and fertilizers we use to keep our yards perfect also find their way into the water we drink, swim in and the fish we eat. Everything that goes into our storm drains and groundwater goes untreated, straight into our rivers and streams.

So, follow the instructions on your garden sprays and lawn fertilizer.
